EXPERIENCE

Jimmy Johns, 4206 E Plaza Dr. (Addition Arena)

August 2022 - PRESENT

As a food preparation worker at Jimmy John's, my role encompasses not only making food for customers, but also making sure to meet accuracy and speed standards. Customer service is a major priority, as my location has relatively few staff so you get to make an impression on every customer that you see. This also means that personal responsibility is very important, as there might not always be others around to spot your mistakes.

Walmart Neighborhood Market, 4255 Alafaya Trail — Cart Attendant

July 2020 - August 2021

As a cart attendant at Walmart, my job was to make sure that the carts were properly returned from the parking lot to the front of the store. A major part of this job was working efficiently, as there was often just one or no other employees to help and I was responsible for keeping the carts stocked even during the busiest hours. Additionally, attention to detail was very important as I held this position during the Covid-19 pandemic and it was my role to clean each of the carts by wiping them down and removing trash or other debris.

EDUCATION

University of Central Florida, Orlando Fl. — *Bachelors in Computer Science (in progress)*

August 2022 - PRESENT (Expected graduation August 2025)

GPA: 3.16

Relevant coursework:

- Intro to Programming Concepts
- Web Development
- C Programming
- C# Programming
- Java Programming
- C++ Programming
- Advanced Java Programming

SKILLS

Computer Skills:
I am very proficient with general computer software and many programming languages such as Java, C, Python, HTML, CSS, JavaScript, and more.

Teamwork & Cooperation:

My roles at Jimmy Johns, Walmart, and my various group projects throughout University have taught me great teamwork skills which allow me to work efficiently in groups.

Personal Responsibility:

I have taken on a great deal of responsibility in not only my previous employment, but also in many of my University classes. This has led to me being accountable, ensuring that I don't hinder others' progress.

Customer Service:

My roles at Walmart and Jimmy Johns taught me a lot about working with customers' needs, even when it may be challenging to do so.

Time Management & Organization:

As a full-time university student, part-time employee,

- Computer Science 1 & 2
- Security in Computing
- Database Systems
- Object Oriented Software

West Orange High School, Winter Garden Fl. — *High School Diploma*

2018 - 2022

GPA: 4.2 (weighted)

Class Placement: 21st out of 1500 students

Valencia College, Orlando Fl. — *Dual Enrollment Credits*

2020 - 2022

During my last two years at West Orange High, I also completed many dual enrollment courses at Valencia College which are contributing towards my Computer Science degree at UCF.

Zen Grid Sudoku web/mobile app

This web app was created as part of a 6-person group project in my Object Oriented Software course. Although it is no longer online due to web hosting fees, it was a fully functional website which allowed users to play sudoku, create/manage their account, save their best puzzle times, and compete with other users' times. It featured a mobile app as well, complete with these features optimized for the mobile experience. I've put photos below to showcase the frontend design, which was my primary role in this project. This project taught me so much about not only web/app design, but also teamwork and time management.

[Project Github (link)](#)

and active scholastic member I often have a very busy schedule. This has taught me important time management and organization skills.

UCF Pegasus Gold Scholar:

I am a recipient of the UCF Pegasus Gold scholarship, which "recognizes outstanding academic performance". I received this scholarship following my high school achievements.

UCF Top 10 Knights:

By being in the top 10% of my graduating class I was also awarded the Top 10 Knight scholarship

Bright futures Florida Academic Scholar:

I received the highest designation from the Bright Futures scholarship program which requires not only outstanding academic performance, but also 100 hours of community service which helped me grow closer to my community and enhance my teamwork skills.

Forest Folio contacts manager web app

This web app was also created in my Object Oriented Software course as part of a 5-person team. It allowed users to create an account and keep track of all of their contacts' information such as name, phone number, email address, etc. Similar to the Zen Grid Sudoku app, it is now offline but I've attached photos below to showcase the frontend design which was my primary contribution.
